INTEK Black Water Line Treatment Program

After housekeeping finishes the normal cleaning of a toilet, flush the toilet at least once to remove all residual cleaning agents. Add the appropriate number of scoops of INTEK-SLC (See Schedule Below) to the water in the toilet or urinal bowl. Stir gently, using the housecleaning toilet brush, then flush. Some blue crystals may remain in urinals after treatment but will dissipate during the facility's normal daily use.

Treatment Program A (For Heavy Scale Removal)

Location	Number of Scoops Per Treatment	Number of Treatments Per Day	Total Scoops per Day
Passenger Cabins	1	2	2
Staff Cabins	2	1	2
Public Urinals and Toilets and Crew's Community Bathroom Urinals and Toilets	3 <i>Flush urinal after adding each scoop</i>	Each Cleaning (minimum 3 times a day)	at least 9

Treatment Program B (For Scale Inhibition)

Location	Number of Scoops Per Treatment	Number of Treatments Per Day	Total Scoops per Day
Passenger Cabins	1	1	1
Staff Cabins	1	1	1
Public Urinals and Toilets and Crew's Community Bathroom Urinals and Toilets	1 <i>Flush urinal after adding each scoop</i>	Each Cleaning (minimum 3 times a day)	at least 3

Ship assignment to Program A or B will be directed by INTEK Technology. Chemicals will be shipped without a request from the ship. Inventory checks will be conducted weekly via email.
